MATERIALS SCIENCE & ENGINEERING A

Subject Index of Volume 198

Absorption
the influence of laser surface melting on the resistance of AISI 4135 low alloy steel to hydrogen-induced brittle fracture 43
Active carbon
corrosion-resistant Ni–Cr–Mo alloys in hot concentrated sulphuric acid with active carbon 145
Advanced materials
engineering with advanced and new materials 245
Al-based metal matrix composites
corrosion resistance of Al-based metal matrix composites 113
Alloying
environmental resistance of intermetallic compounds and composite materials 205
Aluminium alloys
development of "stainless" aluminum alloys by surface modification 51
Al–refractory metal alloys
recent progress in corrosion-resistant metastable alloys 1
Al–Si
structure and corrosion properties of Al/Si and Fe/Zr multilayers 19
Al–Ta alloy films
effect of microstructure on passive film formation and breakdown in sputter-deposited Al–Ta alloy films 11
Amorphous Ni–P alloy
oxidation of an amorphous $Ni_{77}P_{23}$ alloy in air and dry oxygen at 300 °C 35
Aqueous corrosion
origins of the aqueous corrosion and stress corrosion cracking behavior of ductile nickel aluminide 231
Artificial passivation film
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63

Breakdown
effect of microstructure on passive film formation and breakdown in sputter-deposited Al–Ta alloy films 11
Bromide and chloride environments
corrosivity of Br^- and Cl^- on duplex stainless steel 239
Bronze
role of transport properties in corrosion product growth 91

Carbon interface
high temperature corrosion and crack growth of SiC–SiC at variable oxygen partial pressure 103
Cavities
the role of electrode potential distribution in corrosion processes 213
Composites
environmental resistance of intermetallic compounds and composite materials 205
Copper
role of transport properties in corrosion product growth 91
Corrosion
corrosion of rapidly solidified neodymium–iron–boron (Nd–Fe–B) permanent magnets and protection via sacrificial zinc coatings 25
corrosion of SiC monofilament/Ti-15-3-3-3 metal-matrix composites in 3.15 wt.% NaCl 119
microvisualization of corrosion 177
role of transport properties in corrosion product growth 91
structure and corrosion properties of Al/Si and Fe/Zr multilayers 19
study on corrosion properties of sputter coating of oxides on stainless steels 71
the role of electrode potential distribution in corrosion processes 213
Corrosion mechanism
a quartz crystal microbalance study of the corrosion of iron thin films in neutral aqueous solutions 197
Corrosion monitoring
electrochemical studies on corrosion under a water film 161
Corrosion potential fluctuation
potential fluctuation during early stage of stress corrosion cracking of type-304 stainless steel in chloride solution 225
Corrosion protection
development of "stainless" aluminum alloys by surface modification 51
Corrosion rate
a quartz crystal microbalance study of the corrosion of iron thin films in neutral aqueous solutions 197
Covercoats
electrochemical aspects of corrosion resistance and etching of metallizations for microelectronics 153
Crack growth
high temperature corrosion and crack growth of SiC–SiC at variable oxygen partial pressure 103
Crevice corrosion
corrosivity of Br^- and Cl^- on duplex stainless steel 239
Cross-sectional TEM
oxidation of an amorphous $Ni_{77}P_{23}$ alloy in air and dry oxygen at 300 °C 35
Cr_2O_3 powder
oxidation resistance of TiAl significantly improved by combination of preoxidation and Hf addition 85
Cr–Ni–Mo alloys
recent progress in corrosion-resistant metastable alloys 1
Cr–valve metal alloys
recent progress in corrosion-resistant metastable alloys 1

Degradation failure
microvisualization of corrosion 177
Dewpoint corrosion
corrosion-resistant Ni–Cr–Mo alloys in hot concentrated sulphuric acid with active carbon 145

Elsevier Science S.A.

Ductility
origins of the aqueous corrosion and stress corrosion cracking behavior of ductile nickel aluminide 231
Duplex stainless steel
corrosivity of Br^- and Cl^- on duplex stainless steel 239

Ellipsometry
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63
growth of a passive film on iron in a neutral borate solution by three-parameter ellipsometry 169
Engineering
engineering with advanced and new materials 245
Etching
electrochemical aspects of corrosion resistance and etching of metallizations for microelectronics 153

Fe_2O_3–CrO_3 film
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63
Fe–Zr
structure and corrosion properties of Al/Si and Fe/Zr multilayers 19
Frequency analysis
potential fluctuation during early stage of stress corrosion cracking of type-304 stainless steel in chloride solution 225

Galvanic
corrosion of SiC monofilament/Ti-15-3-3-3 metal-matrix composites in 3.15 wt.% NaCl 119
Galvanic corrosion
electrochemical aspects of corrosion resistance and etching of metallizations for microelectronics 153
Growth
growth of a passive film on iron in a neutral borate solution by three-parameter ellipsometry 169

Hf addition
oxidation resistance of TiAl significantly improved by combination of preoxidation and Hf addition 85
High temperature
oxidation resistance of TiAl significantly improved by combination of preoxidation and Hf addition 85
Hydrogen embrittlement
environmental resistance of intermetallic compounds and composite materials 205
the influence of laser surface melting on the resistance of AISI 4135 low alloy steel to hydrogen-induced brittle fracture 43

Intermetallic compounds
environmental resistance of intermetallic compounds and composite materials 205
Ion plating
surface modification of stainless steel in plasma environments 75
Ionic contamination
electrochemical aspects of corrosion resistance and etching of metallizations for microelectronics 153
Iron
growth of a passive film on iron in a neutral borate solution by three-parameter ellipsometry 169
Iron thin film
a quartz crystal microbalance study of the corrosion of iron thin films in neutral aqueous solutions 197

Kelvin probe
electrochemical studies on corrosion under a water film 161
Kinetics
the influence of laser surface melting on the resistance of AISI 4135 low alloy steel to hydrogen-induced brittle fracture 43

Limiting current
electrochemical studies on corrosion under a water film 161
Low alloy steels
the influence of laser surface melting on the resistance of AISI 4135 low alloy steel to hydrogen-induced brittle fracture 43

Material selection
corrosivity of Br^- and Cl^- on duplex stainless steel 239
Metal-matrix composites
corrosion of SiC monofilament/Ti-15-3-3-3 metal-matrix composites in 3.15 wt.% NaCl 119
Microelectronics
electrochemical aspects of corrosion resistance and etching of metallizations for microelectronics 153
Microstructure
effect of microstructure on passive film formation and breakdown in sputter-deposited Al–Ta alloy films 11
MOCVD
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63
Modulation wavelength
structure and corrosion properties of Al/Si and Fe/Zr multilayers 19
Molybdate
passivity of high-nitrogen stainless alloys: the role of metal oxyanions and salt films 135
Multilayers
structure and corrosion properties of Al/Si and Fe/Zr multilayers 19

Nd–Fe–B
corrosion of rapidly solidified neodymium–iron–boron (Nd–Fe–B) permanent magnets and protection via sacrificial zinc coatings 25
Neutral aqueous solution
a quartz crystal microbalance study of the corrosion of iron thin films in neutral aqueous solutions 197
Neutral chloride solution
potential fluctuation during early stage of stress corrosion cracking of type-304 stainless steel in chloride solution 225
New materials
engineering with advanced and new materials 245
Nickel aluminide
origins of the aqueous corrosion and stress corrosion cracking behavior of ductile nickel aluminide 231
Nitric acid
corrosion resistance of zirconium and zirconium–titanium alloy in hot nitric acid 127
Nitrogen
passivity of high-nitrogen stainless alloys: the role of metal oxyanions and salt films 135
Ni–Cr–Mo alloy
corrosion-resistant Ni–Cr–Mo alloys in hot concentrated sulphuric acid with active carbon 145

Oxidation
environmental resistance of intermetallic compounds and composite materials 205
high temperature corrosion and crack growth of SiC–SiC at variable oxygen partial pressure 103
oxidation of an amorphous $Ni_{77}P_{23}$ alloy in air and dry oxygen at 300 °C 35
recent progress in corrosion-resistant metastable alloys 1
Oxidation resistance
oxidation resistance of TiAl significantly improved by combination of preoxidation and Hf addition 85
Oxide coating
study on corrosion properties of sputter coating of oxides on stainless steels 71

Passivation
effect of microstructure on passive film formation and breakdown in sputter-deposited Al–Ta alloy films 11
Passive film
growth of a passive film on iron in a neutral borate solution by three-parameter ellipsometry 169
Passivity
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63
corrosion resistance of zirconium and zirconium–titanium alloy in hot nitric acid 127
corrosion-resistant Ni–Cr–Mo alloys in hot concentrated sulphuric acid with active carbon 145
passivity of high-nitrogen stainless alloys: the role of metal oxyanions and salt films 135
Permanent magnets
corrosion of rapidly solidified neodymium–iron–boron (Nd–Fe–B) permanent magnets and protection via sacrificial zinc coatings 25
Permeation
the influence of laser surface melting on the resistance of AISI 4135 low alloy steel to hydrogen-induced brittle fracture 43
pH of zero charge
study on corrosion properties of sputter coating of oxides on stainless steels 71
Pinhole
study on corrosion properties of sputter coating of oxides on stainless steels 71
Pitting
corrosivity of Br^- and Cl^- on duplex stainless steel 239
development of "stainless" aluminum alloys by surface modification 51
effect of microstructure on passive film formation and breakdown in sputter-deposited Al–Ta alloy films 11
the role of electrode potential distribution in corrosion processes 213
Pitting potential
corrosion resistance of Al-based metal matrix composites 113
Pitting precursor sites
microvisualization of corrosion 177
Plasma-assisted CVD
surface modification of stainless steel in plasma environments 75
Potential distribution
the role of electrode potential distribution in corrosion processes 213
Potentiostatic control
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63
Preoxidation
oxidation resistance of TiAl significantly improved by combination of preoxidation and Hf addition 85

Quartz crystal microbalance
a quartz crystal microbalance study of the corrosion of iron thin films in neutral aqueous solutions 197

Sacrificial zinc coatings
corrosion of rapidly solidified neodymium–iron–boron (Nd–Fe–B) permanent magnets and protection via sacrificial zinc coatings 25
Silicon carbide
corrosion of SiC monofilament/Ti-15-3-3-3 metal-matrix composites in 3.15 wt.% NaCl 119
high temperature corrosion and crack growth of SiC–SiC at variable oxygen partial pressure 103
Silicon carbide whiskers
corrosion resistance of Al-based metal matrix composites 113
Silver
role of transport properties in corrosion product growth 91
SIMS
oxidation of an amorphous $Ni_{77}P_{23}$ alloy in air and dry oxygen at 300 °C 35
Spent nuclear fuel
corrosion resistance of zirconium and zirconium–titanium alloy in hot nitric acid 127
Spontaneous passivation
recent progress in corrosion-resistant metastable alloys 1
Sputtering
surface modification of stainless steel in plasma environments 75
Stainless steel
passivity of high-nitrogen stainless alloys: the role of metal oxyanions and salt films 135
study on corrosion properties of sputter coating of oxides on stainless steels 71
surface modification of stainless steel in plasma environments 75
Stress corrosion cracking
corrosion resistance of Al-based metal matrix composites 113
corrosion resistance of zirconium and zirconium–titanium alloy in hot nitric acid 127
corrosivity of Br^- and Cl^- on duplex stainless steel 239
origins of the aqueous corrosion and stress corrosion cracking behavior of ductile nickel aluminide 231
potential fluctuation during early stage of stress corrosion cracking of type-304 stainless steel in chloride solution 225
Sulphuric acid
corrosion-resistant Ni–Cr–Mo alloys in hot concentrated sulphuric acid with active carbon 145
Sulfide corrosion
recent progress in corrosion-resistant metastable alloys 1
Surface modification
development of "stainless" aluminum alloys by surface modification 51
surface modification of stainless steel in plasma environments 75

TiAl
oxidation resistance of TiAl significantly improved by combination of preoxidation and Hf addition 85
Titanium
corrosion of SiC monofilament/Ti-15-3-3-3 metal-matrix composites in 3.15 wt.% NaCl 119
Transpassivity
corrosion characteristics of Fe_2O_3–Cr_2O_3 artificial passivation films under potentiostatic control 63
Type-304 stainless steel
potential fluctuation during early stage of stress corrosion cracking of type-304 stainless steel in chloride solution 225

Undercutting
electrochemical aspects of corrosion resistance and etching of metallizations for microelectronics 153

Water film
electrochemical studies on corrosion under a water film 161
Wet and dry cycle
electrochemical studies on corrosion under a water film 161

XPS
oxidation of an amorphous $Ni_{77}P_{23}$ alloy in air and dry oxygen at 300 °C 35
passivity of high-nitrogen stainless alloys: the role of metal oxyanions and salt films 135

Zirconium
corrosion resistance of zirconium and zirconium–titanium alloy in hot nitric acid 127
Zirconium–titanium alloy
corrosion resistance of zirconium and zirconium–titanium alloy in hot nitric acid 127
